Recommendation on behalf of Denise Drace-Brownell

Denise Drace-Brownell found an avenue to resolve a licensing issue with an early stage sepsis diagnostic test, which was very helpful in our firm's later development of its market approach.

I later learned more of Denise's own story: her overcoming of some pretty significant personal obstacles in her own life. She serves as a living example for any person saddled with a physical challenge, and has demonstrated the immense power produced from her ability to harness and focus her strengths.

Denise is proof. Hear her story.

Regards,

Joseph M. Marasco, PhD
